

2020-05-13 BC's Restart Plan

The College is receiving a high volume of queries from naturopathic doctors regarding BC's Restart Plan. We understand how important this is to everyone. Further to our email of Friday, May 8, we are working collaboratively with our fellow health profession regulators and other key agencies on information and guidance for all health professionals in BC, and will communicate that guidance to naturopathic doctors as soon as it becomes available. Until that time, we thank naturopathic doctors for their patience as we work together with other regulators and agencies on developing clear and helpful guidance for naturopathic doctors and other health professionals.
